NOTICE: The product has been tested to fit securely to the listed vehicles. Instructions are provided for your convenience. You are responsible for the use of the product and determine if you have the skill to attach the product without causing damage to your vehicle or the product. A-Tach Mounts will not be responsible for any damage to the vehicle due to the installation and/or use of the product.

Read all the instructions and view the photos before attaching this product.

Once the mount and holder are screwed together, the items are considered used and non-refundable.

For best results, attach the mount or hold the mount over the place where the mount attaches to the dash **BEFORE** attaching the device holder to the vehicle mount to ensure a proper fit with the location. Most often the mount will appear to be a little too big or small for the intended location. Once attached, the mount should remain attached until you would like to permanently remove it.

WARNING: AVOID extreme heat conditions. It can damage the device and the mount.

(1) Clean the area where the mount will attach. The mount will attach into the dash top seam and the dash edge above the display illustrated with the arrows in the photo.

(2) Remove the covering from the tape. Place the bottom of the mount onto the dash edge above the display. See photo.

(3) Press forward and, at the same time, press downward on the top of the mount to flex the thin front edge of the mount into the dash top seam by the speaker cover. Use the seam tool if needed to open the seam a little.

(4) Press the front edge of the mount into the seam to make sure the tape connects. The tape will not leave any residue if the mount is removed in the future.
