

**A-Tach # 50197**

**Designed for:** Kia Seltos 2020 - 2023  
Fits along entire vent area for better positioning.

**A-Tach**  
*Mounts*

**A-Tach** solutions consist of two separated parts that are brought together to create a secure mounting solution. The first part is the vehicle mount and the second part is the device holder. The vehicle mount is not designed to be attached and taken off the vehicle repeatedly or on a regular basis. Once it is attached, it should remain attached until you would like to permanently remove it.

**Attention:** Read all instructions and review the images before attaching this product.

**NOTICE: PLEASE READ THIS INFORMATION**  
**Once the mount is screwed into or the pre-drilled holes enlarged in any way, the mount is considered used and is not refundable.**

Ensure the fit of the mount onto the vehicle first. For best results, attach the mount or hold the mount over the place where the mount attaches to the dash **BEFORE** attaching the device holder to the vehicle mount to ensure a proper fit with the location. Most often the mount will appear to be a little too big or small for the intended location. Once attached, the mount should remain attached until you would like to permanently remove it.

**WARNING: PROTECT from extreme heat conditions.**  
**Extreme heat can damage the device and the mount.**

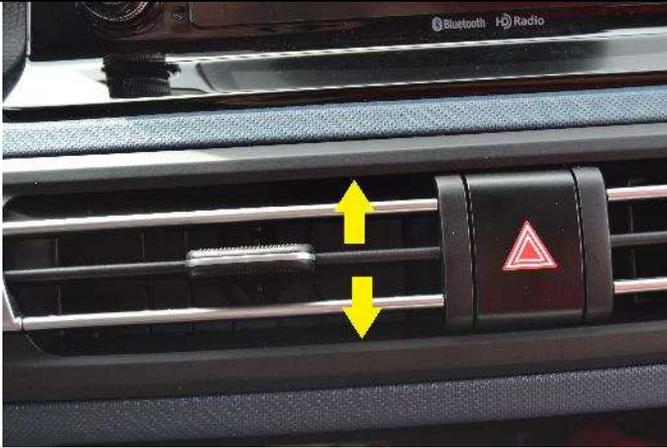

Extreme temperatures can have a big impact on dash panels, cell phones, cell phone mounts and almost anything placed in the vehicle. A car windshield can also have a magnifying effect on a dash, so we like to remind customers with a warning to avoid this happening when possible. A sun reflector in the windshield or park in the shade are a couple ideas that will help with extreme heat concerns.

**See additional instructions on the back side.**

## Installation instructions

(1) Clean the area where the mount will attach. The mount will attach onto the top and bottom vent frame illustrated with the arrows in the photo.

(2) Hook one notched edge of the mount onto the lower vent frame.

(3) Press down on the top of the mount and flex the top notched edge onto the top vent frame.

(4) The mount attached.
