A-Tach

Mounts

A-Tach solutions consist of two separated parts that are brought together to create a secure mounting solution. The first part is the vehicle mount and the second part is the device holder. The vehicle mount is not designed to be attached and taken off the vehicle repeatedly or on a regular basis. Once it is attached, it should remain attached until you would like to permanently remove it.

Attention: Read all instructions and review the images before attaching this product.

NOTICE: Please hold the vehicle mount and device holder over the place where the solution attaches to the dash **BEFORE** attaching the device holder to the vehicle mount to ensure a proper fit with the location of the solution. **Once screwed together the products are non-refundable.**

Remember: Instructions are provided for your convenience. You are responsible to determine if you have the skill to attach the solution to your vehicle.

WARNING: DO NOT interact with the device while the vehicle is in motion.

(1) Clean the area where the mount will attach. The top edge of the mount will attach into the seam between the padded dash top and the frame around the display illustrated with the arrow in the photo.

(2) The lower edge of the mount will attach into the seam between the display and the display frame illustrated with the arrow in the photo.

(3) Press the thin top edge of the mount all the way into the top seam. The tape will not leave any residue if the mount is removed in the future.

(4) Press forward and upward on the lower edge of the mount until the lower edge goes all the way into the lower seam.

This mount cannot be reattached.

Once attached, this mount will not be able to be removed without breaking the mount.
