Designed for: Acura TLX 2015 - 2020

ST-2

A-Tach
Mounts

NOTICE: The product has been tested to fit securely to the listed vehicles. Instructions are provided for your convenience. You are responsible for the use of the product and to determine if you have the skill to attach the product without causing damage to your vehicle or the product. A-Tach Mounts will not be responsible for any damage to the vehicle due to the installation and/or use of the product.

Read all instructions and view the photos before attaching this product.

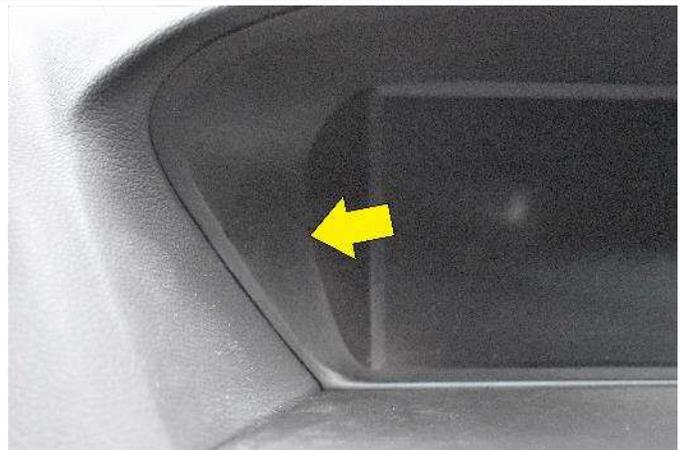

NOTICE: Please hold the vehicle mount and device holder over the place where the solution attaches to the dash **BEFORE** attaching the device holder to the vehicle mount to ensure a proper fit with the location of the solution. **Once screwed together the products are non-refundable.**

Remember: Instructions are provided for your convenience. You are responsible to determine if you have the skill to attach the solution to your vehicle.

WARNING: DO NOT interact with the device while the vehicle is in motion.

(1) Clean the area where the mount will attach. The notched left edge of the mount will attach into the seam between the left side of the frame around the speedometer and the padded dash to the right of the panel. See arrow in photo.

(2) The right edge of the mount will insert into the seam between the upper display and frame around the display. See arrow in photo.

(3) Press the thin edge of the seam tool into the seam illustrated in photo 1 above. Use two seam tools if needed. (One above and one below where the mount attaches.)

(4) Remove the covering from the tape. Press the notched left edge of the mount all the way into the left seam illustrated in photo 1 above.

See additional instructions on the back side.

NOTICE: The mount should appear to be too small to. Here is why. The left edge of the mount is notched and will hook into the seam between the speedometer panel and padded dash to the right of the panel. It is a tight seam but the two seam tools should help to open the seam for the notched edge to insert. The front edge of the mount hooks onto the panel on the left side of the display. That edge of the mount will need some consistent pressure to the left to keep the edge of the mount into that seam. If there is not enough flex built into the mount, the front edge of the mount will not stay into that front seam. So, the mount is built with enough flex built into the mount to keep it tight. That flex is created by making the mount so it will look too short to fit into place. Short mounts do not flex much but the longer the mount is the more it needs to be flexed to stay tight. This mount is a little longer than most so it will look to be way too short to fit. The mount should flex into place and fit securely when attached.

(5) Flex the right side of the mount forward to hook the right edge of the mount into the seam illustrated in photo 2.

(6) Press in on the right side of the mount to make sure the tape connects. The tape will not leave any residue if the mount is removed in the future.

Warranty and Returns

A-Tach Mounts Limited Warranty

A-Tach warrants the product to be free of all defects in materials and workmanship for a period of six (6) months from the date of purchase. This warranty extends to the original buyer.

Within the period of this warranty, A-Tach has the option to repair or replace the item or refund the purchase price. Any replacement parts will be done on an exchange basis. All repairs and service must be done by A-Tach. Product must be delivered to A-Tach during the warranty time along with proof of purchase price and date. The shipping and packaging costs will be the buyer's responsibility. Labor costs and parts to repair will be A-Tach Mounts responsibility.

Damaged products caused by anything outside of shipping damage are not covered by this warranty. A-Tach will not be responsible for any property damage due to the use of the product. Any above exclusion may not apply in states that do not allow the exclusion or limitation. This warranty gives you specific legal rights. You also may have other rights which vary from state to state.

Returns

Before any product may be returned, A-Tach's must give prior approval. An RMA# (Return Merchandise Authorization Number) needs to be given to the buyer to return a product. All returns must be within (30) days of the invoice date and include proof of purchase. Any returned product must be undamaged and in like new condition. Returned product must be scratch free with no additional holes or screw marks on the product.

A-Tach reserves the right to withhold any refund if the product is believed to be damaged. A return must include a copy of the original order or invoice. All parts and components that were shipped with the original product must be included with the returned.
