Mounts

NOTICE: The product has been tested to fit securely to the listed vehicles. Instructions are provided for your convenience. You are responsible for the use of the product and to determine if you have the skill to attach the product without causing damage to your vehicle or the product. A-Tach Mounts will not be responsible for any damage to the vehicle due to the installation and/or use of the product.

Read all instructions and view the photos before attaching this product.

BEFORE attaching the device holder to the vehicle mount, hold the vehicle mount over the place where the mount attaches to the dash to ensure a proper fit with the location. Most often the mount will appear to be a little too big or small for the intended location. The mount is designed this way to stay securely attached onto the dash. The mount must be installed **BEFORE** a device holder is screwed onto the vehicle mount.

Once screwed together the products are considered used and non-refundable.

The vehicle mount is not designed to be attached and taken off the vehicle repeatedly or on a regular basis. Once it is attached, it should remain attached until you would like to permanently remove it.

WARNING: AVOID extreme heat conditions. It can damage the device and the mount.

(1) Clean the area where the mount will attach. The upper edge of the mount will attach into the defrost vent opening illustrated with the arrow in the photo above. **(Use the correct vent opening)**

(2) The lower edge of the mount will attach onto the edge of the dash top above the center vents illustrated with the arrow in the photo above.

(3) **Remove the covering from the tape.** Press the front edge of the mount all the way into the defrost vent opening.

(4) Flex the face of the mount towards you and hook the lower edge over the dash top edge.

See additional instructions on the back side.
